- 4 ea. 8/32" x 3/4" Flat Head Screws
- 2 ea. 1-1/8" Round Head Screws and Knobs
- 4 Slip Pin Hinges 1 Hook and Latch
- 4 Inner Panel Hinges

INSTALLATION GUIDE

OUTSIDE MOUNT

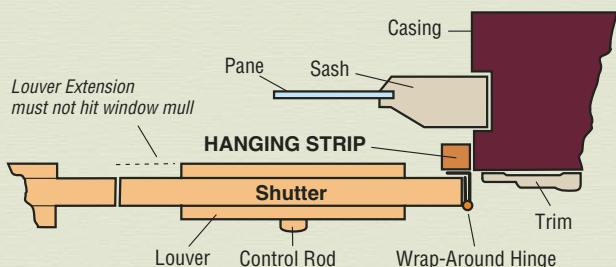

(No trimming required.)

Hanging strip may be mounted to window trim moulding or directly to the wall outside the molding.

INSIDE MOUNT

(Some trimming may be required.)

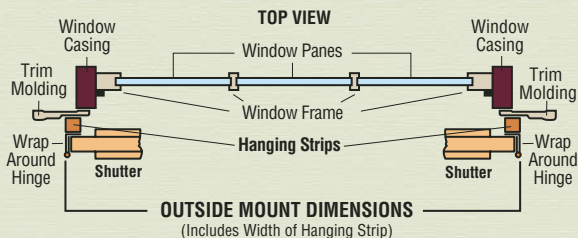

WINDOW MEASUREMENTS

NOTE: Remember to measure and remeasure to verify your numbers before selecting your shutter set.

Hanging strips mount behind the shutter panel.

OUTSIDE MOUNT

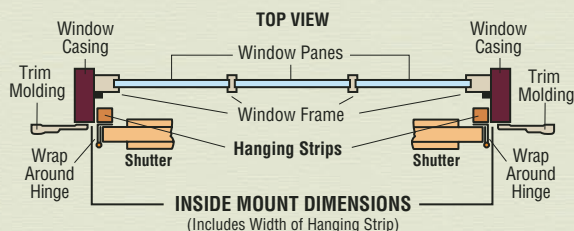

(No trimming required.)

1. Locate the first flat area wide enough to mount the 3/4" hanging strip. Note: For shutter sets mounted on window moulding, moulding must have a flat area of at least 1/2".
2. Measure the width in 2 places: top and bottom.
3. Measure the height in 2 places: left and right.
4. If no moulding, or if mounting on the wall beyond the moulding, add 3/4" overlap on each side to the opening.

INSIDE MOUNT

(Some trimming may be required.)

1. Check the depth of the opening. A depth of 3/4" is needed to mount 1-1/4" louver shutters.
2. Check squareness by measuring diagonally. **If the measurements differ by more than 1/4", we suggest using an outside mount.**
3. Measure the width in 3 places: top, center, and bottom.
4. Measure the height in 3 places: left, center and right.
5. Use the smallest measurements.
