CUSTOM OPTIONS

- **Rail Placement:** Distance from Bottom of shutter to bottom of rail. Rails often align with window elements, lock rail, transoms, muntins, sometimes used to achieve a design independent of window layout. Two equal sections are standard.
- **Custom Options:** Southern Shutter Company can build your shutters to meet your specifications. Select from the options table listed on the price page for your specific shutter type.

SPECIAL INSTRUCTIONS

- **Arch Height:** Provide low and high point of arch or radius
- **Hardware:** Specify using codes from Exterior Hardware Catalog Page. Refer to Getting Started section of catalog for hardware specification.
- **Combination Shutter Options:** Combining louver and panel sections is a common design variation. Indicate your layout from top to bottom. (Example: Louver over panel — L/P) Use Louver Panels Codes from Order Form.

BAHAMA/SPANDREL SHUTTERS

- Sold Per Each (Bahama Width = Width of single shutter panel x 2)
Example: 48" wide Bahama = 24" pair price plus \$100.00 Bahama construction fee.
- Available in 1-3/8" *DesignLine* and Heavy Duty product lines.
- Movable louver shutters are limited to one sub-stile.
- Oversize panels are best broken down into multiple sections for ease of shipping and installation, as well as appearance.
- Stabilizing bars may be used on panels with or without substiles to produce wider louver sections and prevent louver bowing.
- Additional substiles available in all Fixed and Paneled lines.

BOARD & BATTEN SHUTTERS

- Number of Vertical Boards is defined by the customer, allowing the customer a unique design pallet to accentuate different styles of architecture.
- Number of Horizontal Boards is also defined by the customer. Spacings over 42" are not warranted against cupping.
